PROFESSIONAL SUMMARY

Data Analyst with hands-on experience building automated dashboards, KPI frameworks, and ETL workflows using Power BI, SQL, and Python. Skilled in data wrangling, cleansing, and translating large, complex datasets into actionable business insights. Familiar with Tableau and Alteryx; strong foundation in data visualization best practices, UI/UX dashboard design, and agile delivery environments. Strong interest in operational analytics, procurement intelligence, and performance monitoring.

SKILLS

Visualization	Power BI (DAX, Power Query) Tableau Alteryx (Data Wrangling & ETL Workflows) Streamlit
Data & Analytics	SQL MySQL Python (Pandas, NumPy) ETL & Data Wrangling Data Cleansing Advanced Excel (VLOOKUP, HLOOKUP, Pivot Tables)
Reporting	KPI Design Dashboard Automation Trend & Spend Analysis Forecasting Business Reporting Scorecard Development
Business	Requirement Gathering Stakeholder Communication Gap Analysis Process Improvement Agile Methodology UI/UX Dashboard Design Principles
Tools	Git GitHub

PROJECTS

Amazon Sales Performance Analysis | *SQL, MySQL, Power BI* [GitHub ↗](#)

- Consolidated 1,000+ multi-branch sales records through ETL and data wrangling pipelines into structured analytical tables for revenue and pricing analysis
- Designed KPI framework tracking revenue contribution, pricing impact, and demand shifts across product segments
- Identified ~12% revenue leakage via segment-level diagnostics, enabling targeted corrective action
- Automated Power BI dashboards reducing manual reporting by 70%; applied UI/UX best practices for scorecard and visual layout design

Supplier Quality & Procurement Analytics Platform | *Power BI, DAX, Power Query, Alteryx* [GitHub ↗](#)

- Analysed 1,300+ supplier samples using Alteryx-style ETL workflows to evaluate defect rates, cost efficiency, and sourcing reliability
- Applied correlation analysis to measure defect impact on supplier performance scoring, informing procurement risk frameworks
- Built benchmarking dashboards ranking suppliers by risk exposure, specialty performance, and cost factors using DAX-driven data models
- Automated data wrangling and cleansing workflows cutting manual processing by 60%, improving procurement decision speed

Operational Performance & Risk Monitoring Dashboard | *Python, Pandas, Streamlit* [GitHub ↗](#)

- Processed and cleaned 15,000+ operational event logs through structured ETL pipeline to analyse usage trends and peak load behaviour
- Engineered KPIs for system efficiency, anomaly frequency, and operational bottlenecks; implemented agile iterative improvement cycles
- Implemented anomaly detection logic to proactively flag abnormal usage patterns and support risk monitoring frameworks
- Built real-time Streamlit dashboards reducing manual analysis effort by 80% and improving operational response time

CERTIFICATIONS

Certified Data Science Professional — Odin School **Introduction to SQL** — IBM via edX

EDUCATION

B.Tech – Artificial Intelligence & Data Science

2021 – 2025

Vignan's Institute of Information Technology, Visakhapatnam | CGPA: 7.33/10
